

Attribute	Description	Examples
Type	The base type of the room	Room, Suite, Apartment, Villa
Class	A class assigned to the room	Standard, Deluxe, Superior, Poolside, Oceanfront
View	A view assigned to the room	Ocean, Pool, Garden, Strip, Burj Khalifa, Mountain
Feature	A feature assigned to the room	Private Pool, Balcony, Terrace, Hot Tub
RoomCount	The number of bedrooms	One! (etc.)
Accessible	Whether the room has some accessibility options	Initially we will just flag if a room has accessible features, but it is planned to provide full details in a later phase e.g. Roll In Shower, Hearing Accessible
SharedFacilities	Whether the room has shared facilities	For hostels and lower class hotels
NonRefundable	Whether the room is non-refundable*	When included in the room name – 98% of the time this is included as a separate tag in the Availability Response from suppliers
Annex	Whether the room is in an annex	Rare but usually of a lower standard than the main hotel building

The Group Name is built from these elements depending on which are included in the original supplier room name. The Bed Types are also included in the Group Name but not included in the Attributes due to the way they are stored.

So the Group Name will always be in the format:

Number of Bedrooms, Room Class, Bed Types(s), Room Type, View, (with) Features  
 Also the following elements can be included within your profile as required (non-refundable) / (annex) / (shared facilities) / (accessible) - when present

So for example:

2 Bedroom Deluxe Triple Suite (Ocean View) with Balcony (accessible)

or

Standard Double or Twin (Pool or Garden View)

Finally a suggestion for how this could be effectively presented on the website:
